July 13, 2022

The Georgia Environmental Protection Agency is requiring the City of Fort Oglethorpe Public Utilities Department to submit an inventory of every service line in their territory, including the material type for both the customer and utility owned portions of each line for the Lead Water Service Inventory Program by October 16, 2024.

This inventory will require public utility employees to examine the portion of the service line that enters the home/building. In most cases, this will occur at the meter box. On rare occasions, employees may have to glance under the house, and if so, they will knock on the door before doing so. Employees will not have to enter the home for this inventory. Customers will be able to identify the utility employees by their city uniformed shirts as well as city marked vehicles.

We appreciate everyone's cooperation in efforts to comply with the Georgia Environmental Protections Agency's requirements. If you have any questions about the Lead Water Service Inventory Program, please contact the Public Works Department at 706-866-0962.
